

Venue™ Family

Made for Pediatric and Neonatal Patients.

Venue Family's newest edition addresses the specific needs of pediatric and neonatal patients. Enabling fast and confident diagnostic scans without ionizing radiation, the Venue Family of systems enable quick and complete evaluation of your littlest patients.

Infection control

Easy to clean, smooth and seamless surfaces support infection control efforts. Foot pedals easily raise or lower systems, even while seated.

Small footprints

Made for maneuverability where space is at a premium, Venue Family systems are adaptable and conducive to working in tight and crowded spaces.

Ready when you are

Long lasting batteries allow systems to move easily between isolettes without having to stop to plug in to charge. Easy to see count-down timers change color when you are running low.

Simple. Fast. Precise.

Venue™ Family

Made for Your Point of Care.

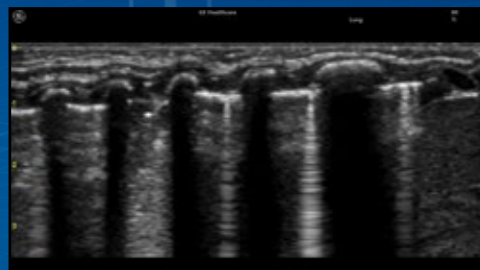

Venue™

Venue Go™

Venue Fit™

Working smarter. Not harder.

Precise, AI tools are designed to enable confident decisions and fast assessments of your littlest patients.

See the entire lung – Fast | Lung Sweep

Developed from the feedback of pediatric physicians, Lung Sweep is an advanced visualization tool that provides a dynamic panoramic view of the entire lung. Lung ultrasound supports early diagnosis of pneumonia.

LUSS in one view | Lung Diagram

Lung Diagram visually maps out lung segments and automatically calculates the Lung Ultrasound Score (LUSS) based on user input.¹

Pneumonia is the single largest infectious cause of death in children worldwide.²

Pediatric Probes | Accessories

With Pediatric ECG and a full set of probes for scanning pediatric patients ranging from neonates to adult sized patients, the Venue Family has you covered.
